

# Quality policy

In NNE, we will manage quality to meet the expectations and needs of all stakeholders with the aim of securing professional engineering and consultancy services with high reliability and compliance.

This includes:

- Develop and deliver high-quality engineering and consultancy services in compliance with customers' expectations
- Develop and maintain a quality management system based on stakeholder expectations, comply with laws and regulations and continuous improvement
- Optimize business performance without compromising on quality and reliability
- Promote quality awareness throughout the company
