

Working environmental policy

At NNE, we believe in social responsibility and providing a sound working environment.

This means that we:

- strive to create a safe and healthy working environment as a natural part of our daily operations. We do this by eliminating danger, reducing risk and identifying improvement measures
- set high standards and continuously improve our working environment globally
- motivate and educate our employees to assume responsibility for aspects affecting their own and their colleagues' safety and health, and to act accordingly
- involve our employees in the effort to improve the working environment
- ensure that working environmental considerations are not neglected in favor of financial and/or productivity related interests
- ensure that relevant legislation, regulatory requirements and other regulations that NNE has agreed to follow within the working environmental area are an integrated part of NNE's Quality Management System
